RaaWee
Truancy & Dropout Prevention System

Bringing a Comprehensive Approach for Teamwork, Tools, Visibility and Accountability to the fight against Chronic Absenteeism

With RaaWee TDPS:

Clearly Understand Barriers to Attendance & Provide each Student with Individualized Interventions & Support

Truancy has long been key indicators of a child in crisis and a student destined to dropout. Chronic absenteeism has been clearly linked to social and community issues such as teenage pregnancy, shoplifting and vandalism. And the critical tie of school funding to average daily attendance has raised truancy to a high-priority challenge of school districts and law enforcement alike.

This is where the RaaWee Truancy & Dropout Prevention System (TDPS) introduces success.

Using four Modules, TDPS Suite delivers a workflow-based Collaboration Network easily customizable to any School District's local environment and procedures.

All internal stakeholders view up-to-date status on a workflow Action Board, receiving real-time by the Truancy Policy Manager (TPM). The success realized by the RaaWee Truancy & Dropout Prevention System (TDPS) generates revenue so quickly that it virtually pays for itself - not somewhere down the road, but right away.

## What would Increasing your ADA by just 1% do for your Operating Budget?

This long-time challenge is perpetuated by lack of tools and resources for early recognition, efficient processing and timely intervention, including:

- Real-time Stakeholder Collaboration
- On-Demand Truancy Data Intelligence
- Efficient Documentation Management
- Instant Access for Field and Office

Collaboration & Interventions

i-App Mobile

Court Documentatation Management

Truancy Intelligence

Improved Student Attitudes & Relationships lead to On-time Graduation.

Comprehensive, Timely and Coordinated Assistance to Students

Collaboration & Interventions (C&I)

The C&I Module ensures automated and individualized interventions provided to every student with attendance related challenges - habitual or chronic truant.

Every school site receives daily Automated Interventions proposed for action. Letters for print, Automated Emails & Text Messages are activated with one-click. Phone calls, Meetings and Visits are simplified by all the information in one place and real-time input of comments. Color-coded alerts ensure timeliness and accountability. Action Boards, Nav Boards, Loss of Credit Boards, and Optional Interventions interfaces make it extremely easy and natural to collaborate among different stakeholders: Child and Parents, Assistant Principal, Intervention Specialist, Attendance Officer, Attendance Committee, Principal, Student Services Director and Juvenile Court.

C&I Module brings success to the School District in helping at-risk youth and their families, by improving school engagement and creating meaningful connections.

Comprehensive documentation of provided interventions, their outcomes, and history are kept in the RaaWee Truancy & Dropout Prevention System for Intervention Specialists reference and pattern recognition. Each stakeholder sees and uses a customized interface of the information their role demand.

Truancy Intelligence (TI)

Poor attendance is a double-edged sword for School Districts. On one side, it's the child's education most affected. On the other side, the School District loses valuable monies absolutely essential in today's growing funding needs for quality education and its associated operational requirements.

The TI module puts a cover on this double-edged sword for your School District. It provides intelligence and analysis for Trends Visibility – clearly identifying areas that can improve.

Data Driven Decision Support is at the fingertips of District and Site Administrators, allowing informed situations resolution and resource allocation like never before. Data mining over hundreds of data points generate thousands of views of critical data analytics and reporting.
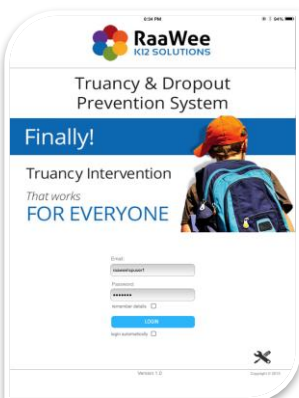

Additionally, TI gives instant visibility into Truancy patterns and compares levels of success. Compiled data is easily assessed and viewed by gender, race, age, grade, school level, site, etc. Timely and informed outreach is then provided for students most in need.

While the C&I Module helps to exchange error-free information among stakeholders and provisioning of individualized interventions in a timely manner, TI brings them together and encourages teamwork towards resolution of the Attendance challenge. This module provides essential tools that keep stakeholders informed and motivated to address student attendance as a top priority.

Court Documentation Management (CDM)

TDPS creates optimal paperwork efficiencies for Student Support and Attendance personnel, so that they spend their valuable time on outreach and counseling for students and families with attendance challenges.

Truancy Court Adjudications are minimized due to tightly coordinated efforts in C&I and TI modules. However, if still necessary, the CDM Module helps the District to promptly and accurately file any necessary court case with all appropriate proof of outreach and requested documentation. Court-related Affidavits and forms customized to the local Juvenile court requirements are created by one click and are hosted at a centralized location. No need for paper folders anymore, all documents are digitally stored and available at anytime through secure access.

Interventions App (i-App)

Many interventions are executed by Attendance Personnel out in the field. In order to best assist students and their guardians, they need on-the-go access to current information. i-App is our TDPS iPad application designed to aid them in the field. Be it a Home visit, Address verification, Attendance Board/Review Team meetings, or representing School District at the Juvenile Court, i-App is their companion toolkit for documentation and instant information access. It allows documenting incidences as they occur, thereby improving accuracy and timeliness. i-App also provides practical mapping, route generation and mileage tools that makes field time & vehicle usage more efficient and cost-effective.

Child Welfare & Truancy Prevention Professionals are talking . . .

"This System is a Cadillac of Truancy Prevention Systems."

"I am blown away after seeing your system. Never thought that something as integrated as this could exist."

"This system will revolutionize the ways Truancy is prevented."

"Absolutely love your Mobile i-App! It's really going to help our officers out in the field."

"This system will help us to easily improve Attendance by percentage points."

"It is so easy to navigate around the system. And its ability to drill down to the cause of any issue is amazing!"

". . . a very intuitive and simple system, it covers every feature that I could think of, and more."

RaaWee TDPS is made for the Teamwork that successful Truancy Prevention Demands!

Benefits

- ✓ Substantial Lift in ADA Revenues for your District

- ✓ Computer-Assisted Individualized Interventions for students at-risk of chronic truancy

- ✓ Identification & Understanding of Barriers preventing student from regular attendance, associated missed ADA

- ✓ Maximized Teacher-Student Instruction & Interaction Time, Grades improvement, increase in High School Credits

- ✓ Cost Savings in After-School & 3rd Party Dropout Prevention, Monitoring, Counseling Programs

- ✓ Early Identification of Chronic Truant Students & any prevailing Tardy behavior

- ✓ Substantial Time & Resource Savings for Assistant Principals, Attendance Clerks & Intervention Specialists

- ✓ Compliance with Federal & State Laws for Truancy Prevention

- ✓ Truancy Court Adjudications minimized with Timely Interventions for Students with Challenges

- ✓ Centralized Information & Documents for Quick and Secure Access

Let our RaaWee implementation experts show you how easily TDPS will integrate into your District's environment today!
